## MAIN TITLE

Produced by Ford Motion Picture Laboratories  
Released through Fitzpatrick & McElroy  
Copyrighted 1921 by Ford Motor Company

## SUB TITLES

1. A Cloud of smoke, a burst of flames and that hungry fiend of destruction sets itself upon some new victim. 900 homes and buildings catch fire daily in the United States, yet we fail to grasp the significance of FIRE PREVENTION.
2. When traced to their source 65% of these fires have a trivial and entirely preventable spark beginning.
3. A lighted cigarette once fell through a bull's-eye in the sidewalk at Baltimore, Maryland. 80 city blocks were burned -- \$40,000,000 were lost. Avoid unnecessary danger by extinguishing matches, cigars or cigarettes.
4. 15,219 people were burned to death in 1920, and 17,641 others seriously burned. Simple in its beginning --- tragic may be its end; so Prevent Fires.
5. Hot ashes must be kept in metal receptacles and away from combustible material if fires are to be checked.
6. Numerous as the reasons resulting in fires may be, yet the simple question, "Do you know how to turn in a fire alarm?" will set thousands guessing.
7. To send in an alarm --- Break glass, turn key, open door, pull down hook once and let go, --- then wait.
8. In the meantime the alarm is received at the Central Station from whence it is transmitted to all other Stations. 15 seconds from the time the box is "pulled," the fire apparatus is on the street.
9. The sender of the alarm directs the firemen to the fire.
10. For the upkeep of Fire Protection together with its enormous fire loss, this country is spending daily -- \$2,000,000.
11. But not always does fire claim its victims.
12. Why is it that New York City must have 4,000 firemen, while Detroit requires only 1,200 and London, England, but 1,500?
13. But here's Nora, who might be anyone's maid.
14. "You're fired!" were the warm words of her mistress.
15. The accumulation of rubbish in any industrial plant is a menace and invites disaster at the hands of careless workers. Waste paints, oily rags, etc., when properly cared for will never cause spontaneous combustion.
16. If the city is graced with a harbor and the usual docks, warehouses, granaries, manufacturing plants, etc., that fringe its shore -- a new kind of fire fighter makes its appearance.
17. The land force also lends a hand.
18. All the great conflagrations of the past 20 years, with the exception of two, could have been averted by practicing FIRE PREVENTION.

(The End)

This document is from the Library of Congress  
“Motion Picture Copyright Descriptions Collection,  
1912-1977”

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
